

Getting Samples Cleared by Health Physics

All samples that have been in the neutron beam must be cleared by health physics prior to being removed from the experimental hall. Take samples to be cleared to the Low Level Radioactive Sample Survey and Staging Area, located in the back of the experimental hall, next to the instrument GPPD:

Fill in the appropriate information in the log book:

Please Supply the Following Information For Every Sample to be Surveyed

Number	Instrument	Personnel Number	Exposure	Exposure Compensation	Survey Time (in Hours:Minutes)	Health Physics Note	Survey Status	Survey & Survey Message
20000	20000				15:00	20000	20000	
20001	20001				15:00	20001	20001	
20002	20002				15:00	20002	20002

20100	20100				15:00	20100	20100	

write the appropriate number on a self-sticking dot, place the dot on the outside of the sample holder, and place the sample inside the upper section of the lexan box, labeled Samples To Be Checked By HP:

Samples will be checked and, if cleared, returned to the appropriate instrument and placed in the sample mailbox:

Samples may now be removed from the experimental hall.
